Work Experience

faciloo

Nov 2024 – present

Senior Software Engineer

I [lead the development](#) of the customer app across web, Android, and iOS using [Angular](#), [TypeScript](#), [C#](#) (.NET Framework), and [MariaDB](#). I manage [DevOps](#), release management, and deployments with Docker, GitHub Actions, and [AWS](#), while ensuring smooth internal and external communication. My role combines engineering, DevOps, and [product strategy](#) to drive innovation and deliver high-quality solutions.

GT-ARC (TU Berlin)

Jul 2023 – Oct 2024

Team Lead: Platform & Applications

Oct 2023 – Oct 2024

I was [leading a small team](#) of developers to build a data platform as distributed system for our automated vehicles and road infrastructure using [Kafka](#), [Postgres](#) and [Python](#). While participating in application development, I was the Tech Lead, Product Owner and responsible for the deployment to [Kubernetes/Docker](#) environments via [GitLab pipelines](#) that I introduced.

Researcher & Software Developer

Jul 2023 – Oct 2024

My research focused on Cooperative, Connected and Automated Mobility (CCAM) alongside the BeIntelli project. I was responsible for developing web applications to make automated driving tangible. These applications were built using [TypeScript](#), [React](#), [Mapbox](#), [MUI](#), [Express.js](#), [Socket.IO](#), and [Prisma](#).

OEV Online Dienste

Dec 2019 – May 2023

Fullstack-Developer (Working Student)

- WordPress web application ([PHP](#)) with serverless backend functionality written in [Java](#)
- Alexa Skill with serverless backend services ([JS](#))
- Multi-tenant Web Components library ([TS](#))
- Corporate web application using [TypeScript](#), [React](#), [Fastify](#), [MongoDB](#), [Keycloak](#), [Kubernetes/Helm](#)

VKB

Jun 2018 – Nov 2019

Software Developer (Working Student)

- Developed a [WordPress](#)-based web shop using [PHP](#)
- Built [microservices](#) in [Java](#) as backend
- Created the frontend with [Bootstrap](#) and [jQuery](#)

Education

Technical University of Berlin

2016 – 2023

M.Sc. – Information Systems Management (1.3)

2020 – 2023

Thesis: "Implementation of a use case mapper for CCAM based mobility solutions in the platform economy framework" (1.0)

B.Sc. – Information Systems Management (1.9)

2016 – 2020

Thesis: "Design and development of a cloud-based solution approach for automated home accessibility assessment as an iOS app" (1.0)
